Postmodern mekanlar

Postmodern furniture pieces, reshaped with the classical lines of today as well as the plain and functional design approach of modern life, constitute the most significant pieces of contemporary interior decoration.

Classical designs in Divanev's postmodern collections are reinterpreted with artistic touches whereas the unique style and details in each piece bring a new breath to living spaces. Furnitures created with wood, metal, glass, stone and texture richness offer a deep and multi-layered aesthetic in spaces.

Establishing an aesthetic balance with its designs and functionality, Divanev initiates a transformation in living spaces, while its prominent pieces create a focal point in the spaces.

RAVEL

INNOVATIVE INTERPRETATION TO MODERN DESIGN

An aesthetic and original design that combines the modernity of gray color with the natural warmth of wood. Ravel Dining Room reveals a modern and elegant design with its plain color and three-dimensional texture applied on the doors. The sideboard module, complemented with framed mirrors that provide integrity with the set, offers decorative as well as functional storage areas.

DO YOU WATCH BOTH TV AND THE TV UNIT?

TV units, which have been an indispensable element of our daily life and are often placed at the heart of living rooms, constitute one of the crucial pieces of home decoration. Choosing the TV unit that best suits the requirements of changing sizes and different decoration styles of homes requires both practical and rational solutions. Divanev TV Units, produced using qualified materials, are designed to offer aesthetic solutions to today's decorative needs and can adapt to many different spaces and decorative styles with their modular diversity.

Shelf, cabinet and bookcase modules that provide extra storage space offer organized spaces that do not allow confusion for small spaces; the ability to be used independently of the TV Unit enables remarkable decorative combinations for larger square meters.

Helis TV unit

In addition to versatile functionality, another factor to consider when choosing a TV Unit is ensuring the ideal eye-level for watching TV. Divanev TV Units, designed taking into account this important feature required to achieve complete comfort, offer you the maximum comfort you are looking for at home with a variety of sizes at the eye level most suitable for the height of your living room.

Stylish Contemporary Design

Divanev's modern collection with original and contemporary design details creates a harmonious atmosphere with the combination of minimalist lines, material diversity and innovative forms. These collections which reflect today's understanding of life in design, establish a balance between functionality and aesthetics by offering a convenience where everyone can reflect their own tastes and decorate their living spaces along with their wishes with modular and customizable pieces.

HELIS

MODERN AND MINIMAL DESIGN

With its wooden color and modern design, Helis Dining Room is indispensable for pleasant tables. While the white stitching and antique bronze coating on the leather handle add innovation to your home, sideboard types in different sizes offer alternative storage solutions. 2 different table alternatives comply with all types of living spaces.

HELIS DINING ROOM

NATURAL BREEZE OF WOOD

With 3 different sizes of sideboard/cabinet alternatives and matte copper colored metal legs, Helical Cabinet High offers maximum storage space in narrow spaces.

Accessible Design in Furniture

The essence of Divanev's accessible design philosophy is to make design accessible to wide segments of society rather than being a high-cost privilege. With unique designs that are far from ordinary, the designers of Divanev deliver the power of design to more people through the use of appropriate materials and relevant production methods. It allows everyone to express their own style and personalize their living spaces with collections that present aesthetics, functionality and original design together.

Lighting Collection

AESTHETIC AND FUNCTIONAL LIGHTING ITEMS

Reflecting the significance of illumination in home decoration with its modern designs, Divanev offers alternative options for different spaces. Divanev Lighting Collection illuminates your living space with its versatile usage advantages and aesthetic designs inspired by trends.

It is possible to create much more effective spaces with correctly selected lighting items for a stylish and spacious home decoration. Whether your goal is to make your space look more spacious than it already is, to illuminate dark areas or to add depth to your room, lighting is the most suitable solution for achieving your needs.

Here are a few tips we have prepared for you that you can refer to when choosing lighting items for different areas of your home...

Right Lighting Tips

Living Rooms

Attention should be paid to the room - lighting balance. For example, in large halls with high ceilings, large-scale chandeliers and pendant lamps will be an ideal choice in terms of appearance as well as illumination.

Complementing the pendant lighting with a floor lamp that will emphasize the corner of the room will bring a completely different breath to the available space.

It is more economical to use energy-saving bulbs in rooms where much time is spent.

For these rooms, 1 or 2 floor lamps, lamps on the coffee table, pendant lamps / chandeliers can be used.

Lizen Pendant Lamp

Feris Lamp

Bedrooms

Using dim lights that will not strain your eyes in bedrooms, such as lamps and floor lamps, will create a more serene environment.

Supporting the chandelier with a chest of drawers top or bedside lamp to ensure that the light is distributed effectively in the room will complete your decoration.

In such spaces, 1 pendant lamp and 2 lamps or 2 pendant lamps on the nightstand instead of a lamp can be used.

Study halls or libraries

Choosing relaxing and soft light in your study room will protect your eye health and provide a productive working environment.

1 pendant lamp, 1 floor lamp and 1 work lamp can be appropriate in these areas.

Dining Rooms

Using pendant lighting above the dining table will create a stylish and effective atmosphere.

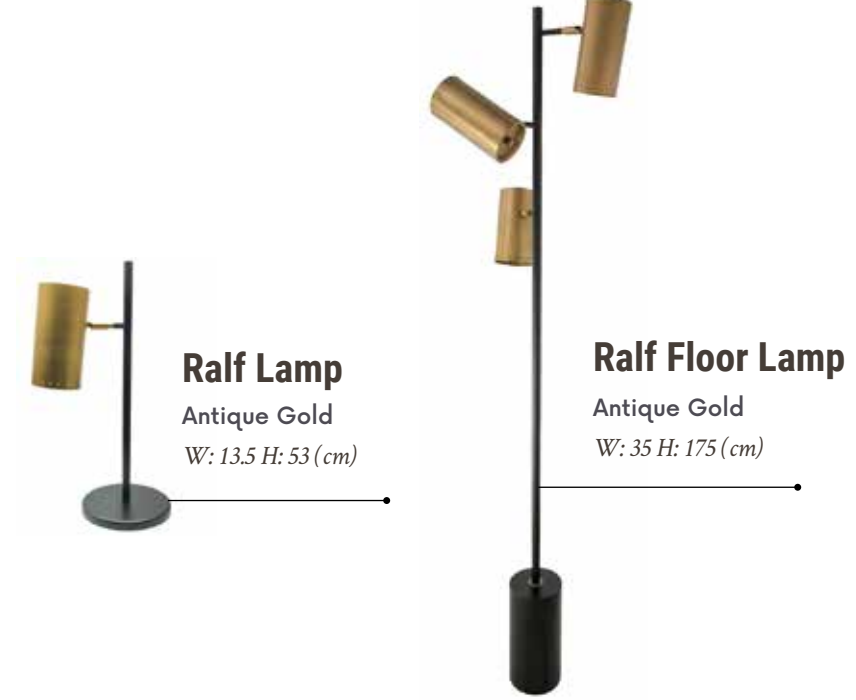

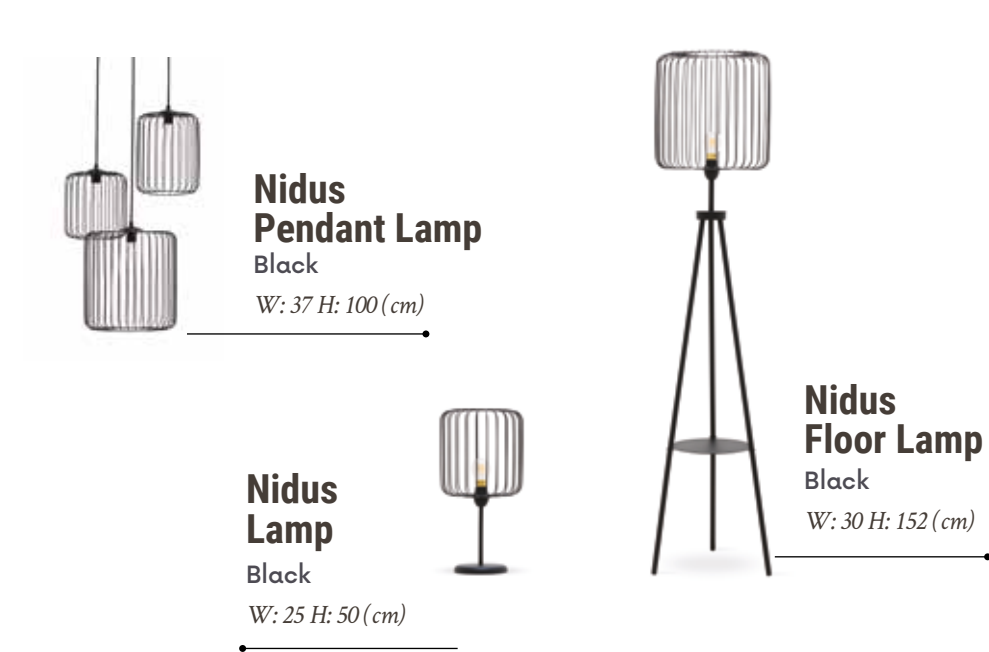

It is important to choose the pendant lamp in line with the length of the table. In this way, all your guests sitting around the table will be equally illuminated.

A chandelier that can be fixed to the ceiling will highlight the details to be emphasized.

For these rooms, 1 pendant lamp, lamps on the coffee table or floor lamp can be used.

BLACK FERIS REFLECTION

Feris Collection adds style to your home with its design reflecting the effects of modernism. Creates a self-illuminating living space by reflecting the light of your home with its multi-headed structure. Appeals to customers who prefer minimal and plain decorations with its matte black color and displays the most aesthetic state of your home.

HOW TO CHOOSE THE RIGHT CARPET?

Carpets are perhaps one of the most important items and the most preferred complementary pieces of the home decoration as they can easily change the atmosphere with both visual and functional features.. It can sometimes be difficult to decide on the right carpet for your home among versatile colors, materials and designs and making a wrong choices may prevent you from achieving the decoration of your dreams.

So, what kind of carpet should you choose to make your living spaces the most modern, aesthetic and useful possible? Here are a few tips for you...

1.

Consider the placement and size of the furniture, not the size of the room.

One of the most common mistakes made when deciding on a carpet is to choose a carpet size that is too small compared to the furniture available in the space. Many decoration styles look better when you allow a certain amount of ground left visible at the edges of the room. Therefore, the basis for determining the most accurate carpet size is to consider the placement and dimensions of the furniture instead of the dimensions of the room.

4.

Make sure that the patterns of the carpet are compatible with the textiles and furniture used in the decoration.

If you have decorated the room with modern and simple pieces, you can easily prefer models with patterns of different sizes when choosing a carpet. If you have included different patterns in your decoration or if you have furniture with embroidered and dominant forms, choosing carpets with simpler and linear patterns will visually balance the space.

2.

For unfurnished areas, make your selection by considering the wall edges.

The carpet size for unfurnished areas of the house, such as corridors and entrances, is determined by how much space will be left from the wall edges. In large areas, you can leave more bare areas on the floor. In smaller and narrower areas, reducing the bare floor area as much as possible will make the space look spacious and rich.

5.

Try different forms for different areas of use.

In addition to the frequently preferred shapes such as rectangle and square, you can choose round carpets for small comfort areas you will create in your living spaces or areas such as bathrooms and entrance halls. Furthermore, you can add an aesthetic detail to the decoration by combining carpets in two different forms in wider spaces.

3.

Pay attention to harmony of colors.

Make sure that the carpet you will use in your living spaces creates a harmony with the colors of the walls, furniture, lighting and decorative accessories. While you can choose a carpet in similar tones with the overall decoration, you can also prefer to use colors that create aesthetic and striking contrasts. One of the easiest ways to achieve harmony in decoration is to choose the carpet from the same or similar tones as one of the existing colors in the room.

6.

Determine the appropriate weaving type and pile height.

Carpets are distinguished from each other by their sizes as well as diversified weaving types, pile heights and extra advantages specific to their designs. For this reason, you should choose a carpet that suits your daily habits as well as visual harmony and comfort. For instance, if your house is frequently dusty or you have to clean frequently due to your pets, short-piled, stain-resistant and easy-to-clean carpet types that will provide ease of cleaning will be the most suitable choice for you.
